Homework 5

Gold Level

Outcome 1 - Calculating Profit

For the following, calculate the profit...

1

Buying Price = £0.03
Selling price = £0.11
Calculate the profit.

2

Buying Price = £0.22
Selling price = £0.51
Calculate the profit.

3

Buying Price = £0.14
Selling price = £0.43
Calculate the profit.

4

Buying Price = £0.15
Selling price = £0.29
Calculate the profit.

5

Buying Price = £0.42
Selling price = £0.63
Calculate the profit.

6

Buying Price = £0.67
Selling price = £1.76
Calculate the profit.

7

Buying Price = £0.29
Selling price = £0.95
Calculate the profit.

8

Buying Price = £0.85
Selling price = £1.95
Calculate the profit.

9

Buying Price = £0.97
Selling price = £2.59
Calculate the profit.

10

Buying Price = £0.75
Selling price = £1.18
Calculate the profit.

Outcome 2 - Buying in Bulk

For each of the following, calculate the total profit...

1

Cost for 6 eggs = £2.22
Individual selling price = £0.48
Calculate the total profit.

2

Cost for 3 strawberries = £0.39
Individual selling price = £0.29
Calculate the total profit.

3

Cost for 2 limes = £0.88
Individual selling price = £0.65
Calculate the total profit.

4

Cost for 5 bottles of cola = £3.85
Individual selling price = £1.25
Calculate the total profit.

5

Cost for 3 truffles = £1.44
Individual selling price = £0.84
Calculate the total profit.
