## Free ATMs could be cut back in cash machine shake-up

Plans to shake-up the UK's ATM network may lead to a "vast reduction" in the number of free-access cash machines. Link, the UK's largest ATM network with 70 000 machines, is proposing to overhaul the operation. Under the change, Link would reduce the amount it charges card issuers to allow customers to use the machines.

Currently some cash machines can charge as much as £2.50 for every withdrawal!

From one of these high-fee cash machines, how many times could a customer with a balance of £300 withdraw a £10 note?

## Boy's very long commute to play for Greenock Morton U-11s

A schoolboy footballer is making regular 160-mile trips from his home in the Western Isles to play for Greenock Morton FC's under-11s. The 10 year old travels from the Isle of Barra for training sessions and matches with the Scottish Championship club twice a week.

Airline Loganair is helping with his travel arrangements. Loganair operates flights from Barra's beach runway to Glasgow, from where the promising young footballer can travel to Greenock.

How many miles does he travel in total every year in order to attend his training sessions?

Give your answer in WORDS.

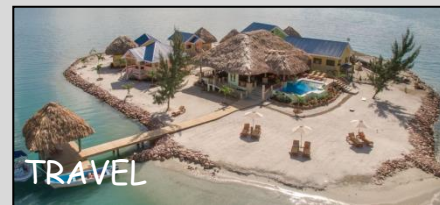

## Rent a private island this summer!

For £1160 per night, you can rent a Belize island with stunning views of the Maya mountains. Included in the price is a private beach, a boat with a personal driver and full staff.

A group of 5 friends want to hire this island for a fortnight.

How much will they each have to pay?

## Great British Bake Off: Final watched by 7.3 million viewers

The Great British Bake Off finale was seen by a live audience of 7.3 million, overnight viewing figures show. The viewing figures come in spite of Prue Leith accidentally tweeting the name of the winner 10 hours early!

But the Bake Off ratings are lower than the 14 million who tuned in to BBC One in 2016 to see Candice Brown crowned champion.

Calculate the drop in ratings as a percentage of last years ratings.

Round your answer to the nearest percent.
