Nissan Leaf electric car goes further with one-pedal driving

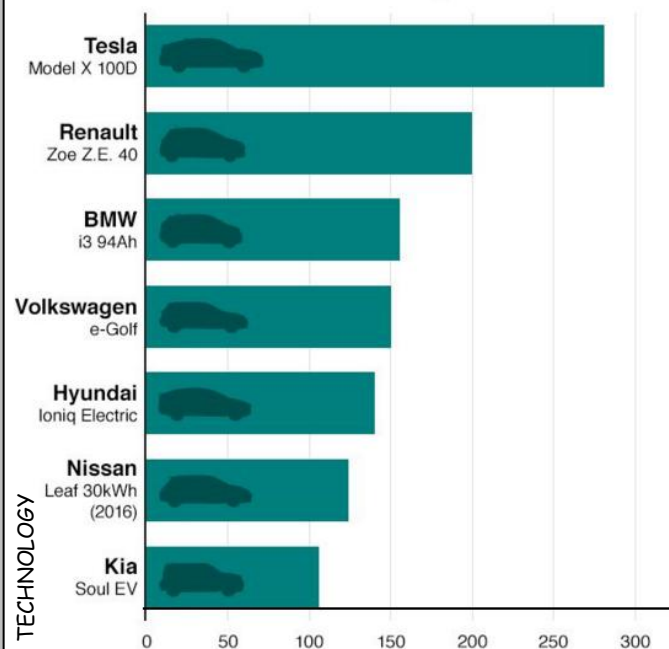

Nissan has launched a longer-range version of its best-selling Leaf electric vehicle, as it fights growing competition in the electric car market.

But it still falls short of the ranges offered by other electric cars as we can see from the bar graph opposite.

The electric car with the furthest range is the Tesla Model X. It can run, in tolerance notation, for (265 ± 45) miles before needing re-charged.

What is the MINIMUM number of battery charges the Tesla Model X needs to make the journey from Lands End to John O'Groats, a distance of 874 miles?

Electric cars: 'Real world' ranges in miles

Mbappe's shirt will cost a fortune!

Kylian Mbappe will wear his trusty No.29 shirt at Paris Saint Germain but anyone wanting to buy his jersey from the Parisiens' club shop will have to fork out a substantial amount - €140 to be precise!

The 18-year old footballing sensation has joined on loan for this season and he will join permanently for an eye-watering £166 million transfer fee next summer.

The current exchange rate is £1 = €1.10.

How many shirts will PSG have to sell before they have raised the full transfer fee?

The wait for VIII is nearly over!

Wednesday the 6th of September saw the start of the 100 day count down until Star Wars Episode VIII: *The Last Jedi* is released to UK cinemas.

(a) What date will Star Wars Episode VIII be released in UK cinemas?

(b) Do you know what day of the week this is?
