'King' Harry Redknapp helps make I'm A Celebrity 2018 a ratings hit

Millions of viewers tuned in live to see Harry Redknapp crowned King of the Jungle on I'm A Celebrity... Get Me Out Of Here!, last Sunday.

He was a popular winner and the programme itself has been a hit this year, with the highest number of viewers for the final in the past five years.

Last year, an average of 9.2 million watched live to see Georgia "Toff" Toffolo crowned Queen of the jungle.

This year, the number of viewers increased by $2^6 \times 3^2 \times 5^5$.

How many viewers tuned in this year to see Harry crowned King of the Jungle?

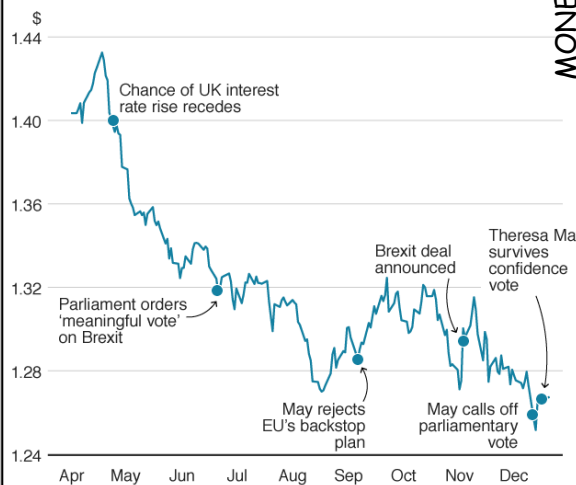

Tourist pound now down at close to just one dollar

Travellers at some UK airports are barely being offered one US dollar for each of their pounds, following a month of Brexit uncertainty.

Those exchanging pounds at the UK's biggest airport, Heathrow, are finding as little as \$1.05 coming back across the counter. In March 2008 the pound was briefly worth \$2.

Alison is exchanging £600 for a New York shopping trip at Heathrow Airport. How much more would she have got for her money had she exchanged it in 2008?

Pound vs US dollar since April 2018

Dad denied £200 000 scratch card win insists he didn't change 'F' to an 'E'

A dad-of-four has been told he will not be paid winnings from a scratch card - despite claiming he scooped the £200 000 jackpot.

Eric Walker, from Sheffield, UK, says he matched three symbols on a £3 Pharaoh's Fortune card.

However, lottery organisers, Camelot, claim his winning card had been doctored to make an 'F' look like an 'E'.

A Camelot spokesman said: "Based on the photo we were sent we were able to re-construct the scratch card in our system.

"We can confirm that an F has been altered to appear as an E and is therefore not a winning scratch card."

Of the six revealed letters (A, B, C, D, E and F) all but one of them have a line of symmetry. Which letter is the odd one out?

UK homes could get faster broadband...for less!

One in seven homes could be paying more than they need to for broadband and could get faster services for less money.

There are 27.3 million households in the UK.

How many of them could get faster broadband for less money?
