

MNU 4-03a

Homework 3

Bronze Level

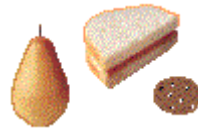

Outcome 1

Problems in Context

Choose your strategy for the following questions...then solve the problem!

- 1** Helen bought a £4.10 sandwich, a 99 pence pear and a 56 pence biscuit for her lunch. How much did she spend in total?

- 2** During turbulence, a plane lowered its altitude from 32 586 feet to 30 728 feet. How many feet did the plane drop its altitude by?

- 3**  There are 60 seconds in a minute. How many minutes are there in 9900 seconds?

- 4** Dominic has an interest free loan from his dad. He will repay him in full by paying him £30 per month for 3 years. How much did he borrow from his dad?

Outcome 2 - Long Multiplication

Work out the answers to the following...

1 67×17 **2** 99×12

3 578×15 **4** 724×19

5 7777×11 **6** 4063×14

Outcome 3 - Long Division

Work out the answers to the following...

1 $1152 \div 16$ **2** $1512 \div 18$

3 $192 \div 12$ **4** $918 \div 17$

5 $912 \div 19$ **6** $990 \div 15$
