Twins born in different DECADES

A pair of twins were born 30 minutes apart last week - in different decades.

Little Joslyn was born at 11:37pm on the 31st of December 2019 and brother Jaxon came 30 minutes later to help celebrate the arrival of the new year.

- (a) At what time was Jaxon born?
- (b) On what date was Jaxon born? Give your answer in the form DD/MM/YYYY.

Dad transforms bathroom floor with £55 worth of 1p coins

A dad has come up with a novel yet fairly inexpensive way to transform his bathroom, having glued £55 worth of 1p coins to the floor!

Check out the picture on the right →

- (a) How many coins did he need to tile his floor?

Unbelievably, this dad wasn't the first person to have glued thousands of pennies to the floor for a new design.

Another man decided to do precisely this at his barber shop in Birmingham - although he used 64 500 MORE 1p coins to line his floor, which means it must've taken SLIGHTLY longer!

← Check out the picture on the left

- (b) How much did it cost to tile this barber shop floor with 1p coins?

Greggs workers each to be given bonus each as thanks for 'phenomenal year'

Workers at Greggs are to be rewarded for a 'phenomenal year' with a share of a 'special bonus', which saw sales jump by more than 13%.

Always Fresh. Always Tasty.™

19 000 staff who have been with the company before and up to the 31st of March 2019 will each receive the full payment of £300, while the remaining 6000 members of staff will each be paid £75.

Employees across the country, which includes more than 2000 outlets, will receive their share of the bonus at the end of January.

How much are Greggs paying out in bonuses to staff altogether?

Give your answer in WORDS.

Edinburgh woman becomes youngest to reach South Pole solo

An Edinburgh adventurer has become the youngest woman to ski solo to the South Pole.

Mollie Hughes, 29, skied for 58.5 days pulling all her food in a sledge during her lone trek across Antarctica.

During the trip, Ms Hughes hauled 105 kilograms on the 702 mile journey from the coast of Antarctica to the South Pole.

Calculate the average speed of her journey in miles per hour.
