## UK government spending on virus measures pushes debt to £2 trillion

UK government debt has risen above £2 trillion for the first time amid heavy spending to support the economy during the coronavirus pandemic.

Last year, the debt stood at one trillion, seven hundred and seventy six billion, four hundred million pounds.

This year, it has rose by two hundred and twenty seven billion, six hundred million. What is the UK government debt now? Give your answer in WORDS.

## Rangers new boy victim of spelling gaffe

Effective literacy skills are essential in any job, especially in kit manufacturing. Rangers' new kit suppliers have shown us why we should always check our working thoroughly before handing it in!

Saturday should have been a great day for Rangers' new signing after he opened the scoring against Kilmarnock.

But the striker might not be too happy with the top he scored in, given his name was spelt wrong on the back!

Using the substitution

1 = a, 2 = b, 3 = c, 4 = d, 5 = e, ... 26 = z

can you work out what name should have been printed on the back of this football jersey?

## World's hottest ever temperature recorded this weekend

The hottest temperature ever recorded on Earth was hit on Sunday after Death Valley in California sweltered in 130 Fahrenheit.

To change Fahrenheit into Celsius we use the following formula;

$$C = \frac{5(F - 32)}{9}$$

WEATHER

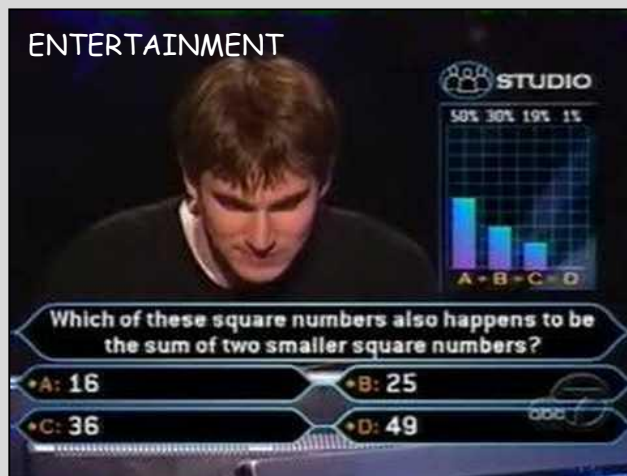

Can you change 130 Fahrenheit into Celsius?

Round your answer to 1 decimal place.

## Who Wants To Be A Millionaire? 'Best ever' contestant to win top prize for first time in 14 years

Viewers will see the currently unnamed contestant, who has already been filmed answering all 15 questions correctly, become the ITV quiz series' sixth champion next month. This gives us a wonderful excuse to reminisce about the time this poor man (and the audience!) incorrectly answered the question below to cost him \$15 000!

ENTERTAINMENT

Can you explain which answer is correct?
