Never use boiling water to make a cup of tea, says expert

A professional food and drink taster has revealed the most common mistake we're all making when it comes to making a classic brew. He says you should never use boiling water to make a cup of tea as "having the water too hot will kill the desirable nuances of tea". Instead, he claims, the water temperature should be $\frac{4}{5}$'s of this amount. What temperature should water be when making a cup of tea?

Piers Morgan defends McDonald's £9 refund

Piers Morgan has defended his £9 refund from Uber Eats after he was criticised for claiming for a soggy burger!

Who doesn't love a bit of algebra on the Chase? Tuesday's episode saw a contestant faced with the following question:

The contest chose option A.

- What do you think the correct answer is? You **MUST** give a reason for your answer!
- Can you re-write the question so that A would be the correct answer?

Non-league side concede 122 goals in 10 games

If you think your team has had a bad start to the season, spare a thought for Stoke Gabriel FC.

The side in South Devon has played 10 games and lost all 10.

They have scored just two goals and conceded 122.

Unsurprisingly they are bottom of South West Peninsula League Premier Division East in the 10th tier of the English football pyramid!

- What is Stoke Gabriel FC's current goal difference?
- On average, how many goals have they conceded per game so far?
