Man eats an array of Crème Eggs in just 24 minutes!

Max Stanford, who runs the Maxvsfood YouTube channel, took on the challenge this week.

- How many crème eggs did he eat?
- If he continued to eat at this rate, how many crème eggs would he eat in one hour?

Ford Mondeo is being discontinued after nearly 20 years in production

Ford has announced that it will no longer be selling the iconic Mondeo, with the car to be 'phased out' by next March.

The saloon car is instantly recognisable to most people in the UK, and millions have been sold around the world since it was introduced in 1993.

The current UK number plate system has been in place since September 2001. UK number plates consist of;

- Two letters to show where the car was registered
- Two numbers as an age identifier
- 3 random letters to uniquely identify the car.

Where the car was registered Registered in Sept 2001 3 random letters

The old 'prefix' number plate system began in August 1983 as a once-annual plate change. The first letter shown was the age identifier and represented the year the car was registered i.e. 'A' = 1983, 'B' = 1984, 'C' = 1985, etc. The letters 'I', 'O', 'Q', 'U' and 'Z' were not used in this system. In 1999, this was updated with a new letter every six months and then continued until the system above was put into place in September 2001.

What year were the following Ford Mondeos registered?

- What was the first letter on the registration plate of the first Ford Mondeo registered?

The remarkable coincidence of Antoine Griezmann's three children

Barcelona and France forward Antoine Griezmann became a father for the 3rd time on Thursday welcoming daughter Alba into the world - and ALL three of his children have the same birthday!

Talk about ideas of chance and uncertainty!

- What is Alba's date of birth?
- Alba's big brother Amaro is two years older than her. What is Amaro's date of birth?
- Amaro's big sister Mia is three years older than him. What is Mia's date of birth?

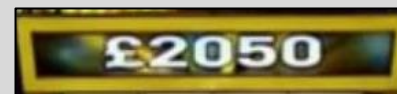

Tipping Point host lacks Growth Mindset

On Friday's episode of Tipping Point, host Ben Shephard declared that "Maths is just horrible, full stop".

Although we think this was meant as a throw away comment in reference to the final question of the episode, we recommend that Mr Shephard subscribes to a Rigour Maths account to develop his skills at bronze, silver and gold level!

In this episode, the contestant won £2050.

In Tipping Point, each counter won is worth £50. How many counters did this contestant win?
