## Scientist travels 10 000 metres underwater and finds a teddy bear!

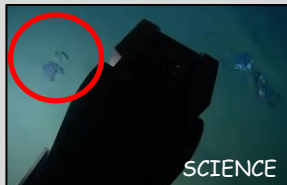

A scientist who travelled 10 540 metres underwater to explore the ocean was stunned to find plastic, clothing and even a teddy bear.

His exploration took four hours to descend, four hours to explore and another four hours to return to the surface.

(a) How long did the scientist spend under water?

The record for the lowest ocean dive ever was 388 metres lower than this back in 2019.

(b) What is the furthest depth below sea level ever reached by humans?

## Dad livid over paying £54 for four portions of fish and chips

A dad 'needs therapy' after paying £54 for four portions of fish and chips at London restaurant, according to his son.

In a viral Twitter post, the son took to social media to share his dad's disgust at the price of fish and chips in the capital.

The Twitter user said: "Dad wanted to buy fish and chips last night. We let him and he gave me his card to pay for them delivered. He's now trying to access therapy as he's realised 4 rounds of fish, chips and mushy peas cost him £54. "Welcome to London, Yorkshireman."

(a) How much did it cost the dad per portion?

In Glasgow, the average cost of a portion of fish and chips is £6.92.

(b) If the same order was bought in Glasgow how much change would be received from £30?

Hull has the cheapest average cost for a portion of fish and chips in the UK!

If the same order was bought there, you would receive £4.52 change from £25.

(c) What is the average cost of a portion of fish and chips in Hull?

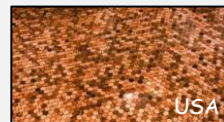

The average cost of a portion of fish and chips across the UK is 63 pence more than the £7.02 average cost of a portion in the North East of England.

(d) What is the average cost of a portion of fish and chips across the UK?

## Woman glues over 7000 pennies to her bathroom floor and potentially misses out on fortune

A woman stuck over 7000 pennies to her bathroom floor to give the room a makeover, but she might have glued down a rather expensive coin by mistake.

She shared her renovation project on TikTok and according to one of her followers there may be a coin in her collection worth a bit more.

According to the follower, one of the coins glued down is a 1943 copper alloy penny which is worth \$82 500!

The United States one-cent coin, often called the "penny", is a unit of currency equalling one one hundredth of a United States dollar.

Including the 1943 copper alloy penny, the total value of the coins on her floor is \$82 576.99.

How many coins did she glue to her floor?

## Harrison Ford spends time on Tyneside on Indiana Jones filming break

Hollywood star Harrison Ford has been spotted on Tyneside while taking a break from filming the latest Indiana Jones movie.

The actor was photographed on Newcastle's Quayside having been cycling nearby.

According to the report he enjoyed a lunch of fish and chips and a pint of lager.

The average cost of a pint of lager in the North East of England is £3.74. How much should Harrison have expected to pay altogether for his lunch?
